

MedVigil Form

User Concern:

The patient has fever

Medical Summary:

- **Point 1:** Fevers are often linked to infections, but they can also be caused by inflammation or reaction to some kind of reaction
- **Point 2:** The patient's symptoms, like a fever, could be clues to what could be going on
- **Point 3:** Do they have any underlying conditions? Like, are they immunocompromised? That could make them more prone to certain infections

Suggested Doctor:

Dr. Mehul Aggarwal (General Physician)

Recommended Time:

Tomorrow at 10:00 AM
